## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. ***Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by MacKay (Patent No. US 4,934,137).***

Regarding claim 1, Mackay shows in Figs. 1-3 an air flow passage (48, 46, 134) for ventilating the purge air; a separation space (48) that is provided in the air flow passage and separates dust in the purge air therefrom; and a filter (50) that is provided in the air flow passage, is located upstream of the separation space, and collects dust in the purge air (Col. 3, lines 48-60 and Col. 5, lines 1-28).

### ***Allowable Subject Matter***

3. **Claims 2-3** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 2-3 are allowable because the prior art fails to disclose or make obvious, either singly or in combination, a purge air flow passage structure comprising, in addition to the other recited features of the claim, "the filter includes two or more

shielding parts each of which has a plurality of passing holes or slits formed in a width direction thereof, the shielding parts are successively arranged along a direction from an upstream side to a downstream side in the air flow passage to be separated from each other by a predetermined distance, and each of the shielding parts includes a wall portion facing upstream that is positioned such that the wall portion is struck by the purge air that passed through the passing hole or slit of the neighboring upstream shielding part".
